

Northstate Emergency Medicine Fellowship Program

visit: nsemfellowship.com

- We are located at [Mercy Medical Center Redding, a Dignity Health Hospital](#) with a 28 bed Emergency Department serving 55,000 patients per year. This is also home to a level 2 trauma center, stroke center, inpatient pediatrics, and other multi specialty services serving the vast area of the Northstate of California.
- We are the only Emergency Medicine Fellowship program for graduates of a Family Medicine Residency program found west of the Rockies. Our program is approved by the [American Board of Physician Specialties](#) with a pathway that leads to [Board Certification in Emergency Medicine](#).
- A one-year intensive training program in the Emergency Department, and with longitudinal experiences on other services: Trauma and General Surgery, Critical Care, Anesthesiology, Orthopedics, and Radiology.
- Fellows are fully licensed board-certified Family Medicine physicians and hold full medical staff credentials in accordance with Family Medicine guidelines. Throughout their program, they will work towards improving Emergency Medicine practice and procedures.
- At all times while in training, Fellows function under the supervision of attending physicians in Emergency Medicine and other specialties they work with in the hospital.
- The yearly education includes dedicated teaching while in the Emergency Department and while on other longitudinal rotation experiences, weekly conferences, quarterly journal clubs, major procedures and critical patient simulations, emergency ultrasound, difficult airway management, research activities, and teaching opportunities.
- Fellows will be encouraged to continue their practice in both Emergency Medicine and Family Medicine after completion of the program and we hope they gravitate to provide services and leadership among the smaller critical access hospitals in our region.
- [Mercy Redding Family Practice Residency Program](#) and [Shasta Community Health Family Medicine Residency Program](#) are the only resident training programs in the hospital and community.
- The Sacramento River Trail courses through Redding and hundreds of miles mountain bike, hiking, and horseback riding trails link up the surrounding foothills, mountains, and Wiskeytown National Recreation Area. We are surrounded by the Trinity Alps, Shasta Lake, Mount Shasta, and Lassen National Park with camping, fishing, boating, climbing, skiing and endless other outdoor adventures.
