

Family Medicine Residency Program

About Our Program

Shasta Community Health Center (SCHC) is an ACGME accredited, 4-4-4 unopposed Family Medicine Rural Training Program with residents that started July 1, 2013. We are affiliated with the University of California, Davis School of Medicine. All three years are spent at SCHC in Redding, California. We partner with UC Davis and OHSU in the COMPADRE Program.

SCHC is a Federally Qualified Health Center, established in 1988. We use NextGen as an EMR and are a PCMH Level 3 at all clinic sites.

Our main site, Enterprise center, and maternity center are located in Redding, California, where our employees enjoy the best of city life and the great outdoors. Redding is known as a recreational paradise.

We have two satellite clinics in the surrounding rural

communities of Shasta Lake and Anderson. Whether your pleasure is skiing, wakeboarding, sailing, hiking, golf, running, mountain biking, or other outdoor activities, you can find it within Shasta County.

Residency Aim and Mission Statement

The SCHC Residency Program's Aim is to train full spectrum family medicine physicians who are prepared in a rural or underserved environment. Our residency is driven by our mission to serve the medically underserved through high quality rotations and teaching.

In doing so, we integrate the SCHC Values that include: Compassion, Advocacy, Adaptability, Respect, Education, and Service.

We envision to train quality care physicians that will ultimately serve the Northern California community. Our training strengths are integrated psychiatry, obstetrics, pain management, palliative care, women's health, pediatrics, addiction medicine and homeless outreach.
